DALI/STD terminal block	-200
Standard/Fused terminal block	-400
DSI/Fused terminal block	-500
DALI/Fused terminal block	-600

The Aureled Vista has been developed with healthcare environments in mind. The Aureled Vista is available with a range of different imagery designed to promote a relaxing and reassuring environment for patients.

Using creative lighting solutions creates a non-institutional feel that puts patients at ease and makes it more likely that they relax and focus on healing.

The Aureled Vista can be a focal and discussion point for young children undergoing medical examinations: Given something to concentrate on they are less likely to become agitated.

Designed and constructed with a shallow 45mm profile with remote driver, the Aureled Vista will slide into confined spaces. Coupled with a detachable gearbox incorporating a plug-and-play connector this luminaire is the perfect solution for locations where there are multiple services installed inside the ceiling space.

Once installed, the gearbox can be detached from the luminaire housing as required whether for upgrading to dimming or maintenance.

Available with:

- DSI Dimming
- DALI Dimming
- Emergency
- CCT 4000K
- Restraint kit
- CLO (Constant Light Output)
- Sensor Options
